

**SLSC High Power Sporting Rifle Match  
28 September 2019  
Match Report**

Overcast sky and no wind made shooting quite pleasant for the six marksmen who competed in our last high power sporting rifle match of the year. Five veteran shooters and one new shooter participated in the match and, to no ones surprise, Jake dominated with 307-3x shooting a scoped AR-15. His father, Mark, was the top scorer in the metallic sighted category. As you can see from the equipment column the AR-15 is increasingly the most popular HP rifle used in this competition but nearly any center fire rifle will do from your trusty Marlin .30-30 leveraction to a Winchester Model 70. It just has to not exceed the weight limit. I personally would like to see more blue steel and walnut on the firing line though I confess to liking to shoot my AR-15 carbine in this match when I get a chance to shoot.

Our next high power rifle match will be the always challenging 50 shot National Match Course which will be held on October 26<sup>th</sup>. Get those shooting irons zeroed in before the match and join the fun. The 5 shots we allow for sighters is usually not enough, but was meant to be just a final check anyways. More details on that match will come out as the date nears.

Dick Chadwick
